

# HeartFelt™

Modular felt  
ceiling system

## HeartFelt™ Linear Ceiling: Structured & Soft

Patented HeartFelt™ linear panels and carriers bring the pleasure of proven polyester felt to the ceiling plane. These uniquely rollformed panels elevate the typical linear ceiling by exchanging metal or wood for felt, joining crisp linearity with unexpected softness. Created from fully recyclable materials, the HeartFelt™ modular ceiling features the unique texture and soft appearance that have long made felt a captivating material for fashion, furniture, and interior décor.

With a material that warms both the visual and acoustical experiences of a space, HeartFelt™ contributes to sound control that facilitates the exchange of knowledge and the flow of communication. Designers and architects can choose from a range of panel spacings to help create pleasing aesthetics in the ceiling plane for interior work and play environments.

## Key Features

- 100% recyclable
- GREENGUARD Gold Certified
- Class A Fire Rated per ASTM E84
- Interior application
- Fade-resistant material
- Easy plenum access

## Colors

HeartFelt™ ceiling panels are available in five shades of grey, offering opportunities to create visual gradients and rhythms at the ceiling plane. Coloration is inherent to the felted polyester material; the blend of black and white fibers within each panel determines its shade. The material resists fading.

Middle Grey 7597F

Off-White 7595F

Dark Grey 7598F

Light Grey 7596F

Anthracite 7599F

## Standard Linear Panel Spacing and Acoustic Values

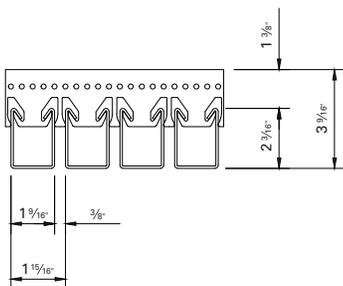

### Inherent Acoustics

Varying the space between panels creates different NRC from 0.50 to 0.70 depending on which carrier module is selected.

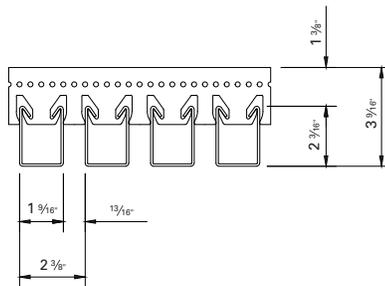

PANEL SPACING	OPEN AREA	REVEAL	NRC
1 <sup>15</sup> / <sub>16</sub> "   50mm	20%	<sup>3</sup> / <sub>8</sub> "	0.70
2 <sup>3</sup> / <sub>8</sub> "   60mm	33%	<sup>13</sup> / <sub>16</sub> "	0.60
3 <sup>1</sup> / <sub>8</sub> "   80mm	50%	1 <sup>9</sup> / <sub>16</sub> "	0.50

### Cross Sections

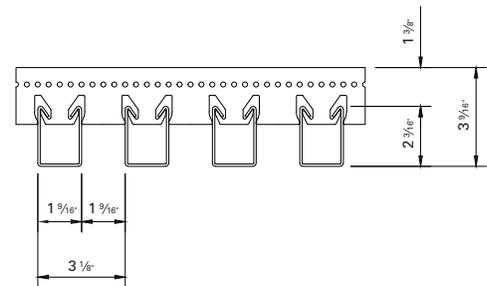

1 <sup>15</sup>/<sub>16</sub>" (50mm) Module

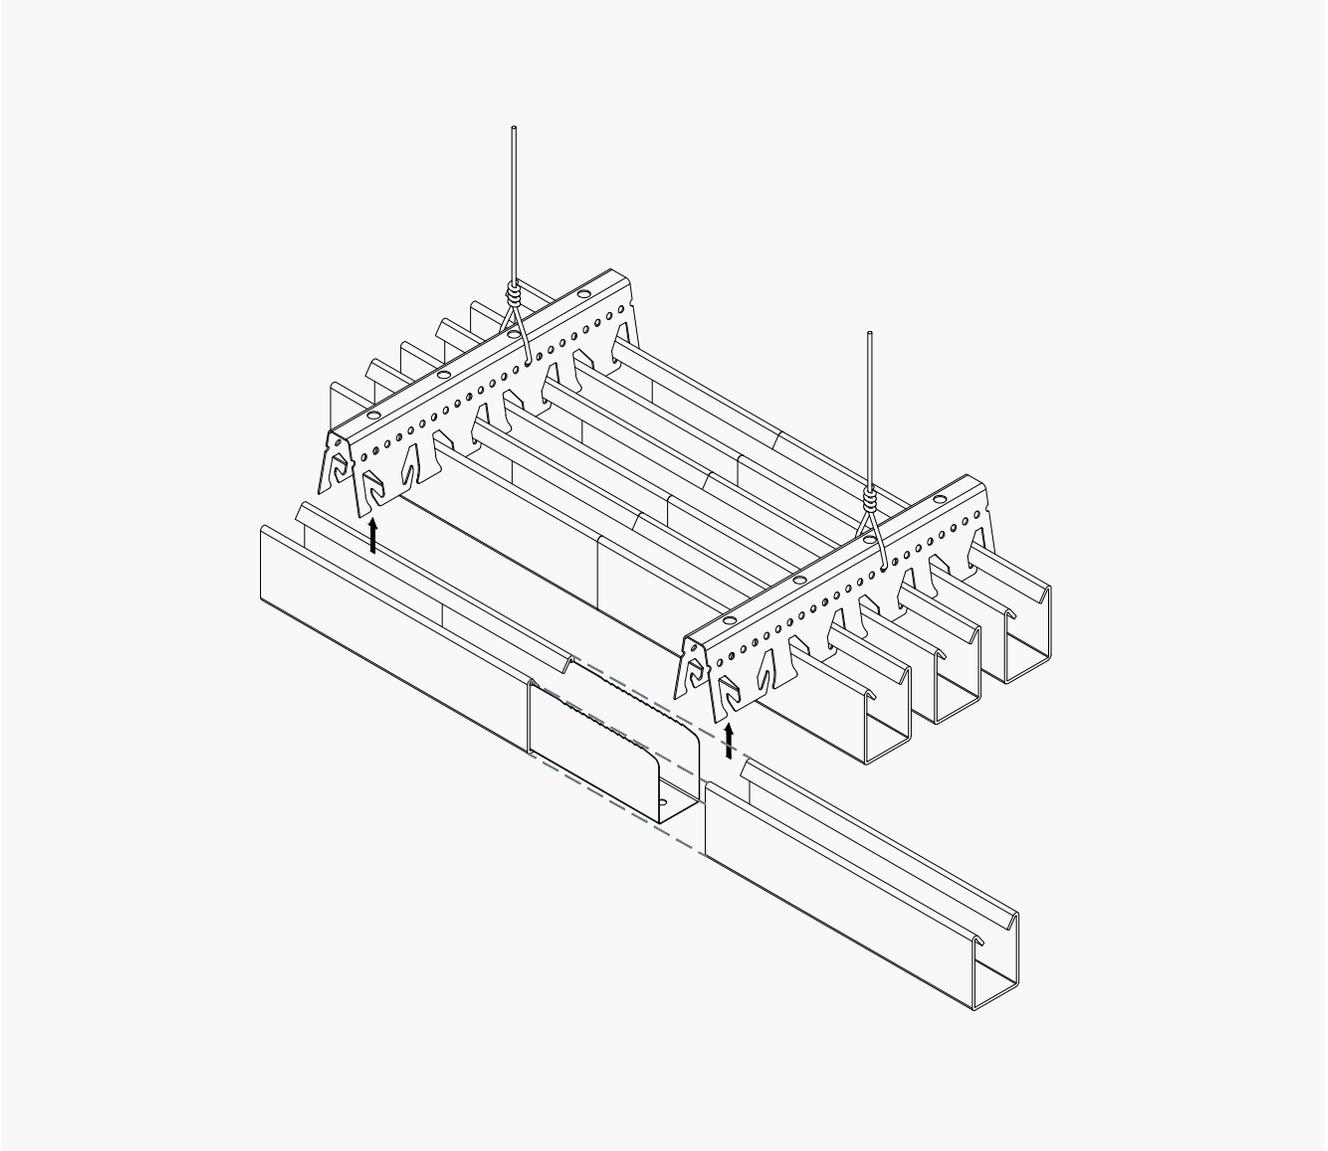

2 <sup>3</sup>/<sub>8</sub>" (60mm) Module

3 <sup>1</sup>/<sub>8</sub>" (80mm) Module

## Construction Detail

## Installation

The HeartFelt™ system allows installation as both a cloud and a full ceiling. Individual pieces can be spliced to create longer continuous lengths. The lightweight panels easily clip into the engineered modular carrier systems. Panels can be field trimmed using a sharp knife. The system integrates with many available lighting, HVAC, and safety systems.

## Maintenance

Panels do not require special cleaning processes or solutions; light vacuuming or dusting as needed will maintain their appearance. Given the unique and special nature of our HeartFelt™ ceiling product, steps should be taken (before and during installation, as well as over the lifetime of the ceiling) to avoid or minimize static and the accumulation of dust, lint, dirt or airborne particles on or around the felt. Hunter Douglas does not warrant against or take responsibility for any such static or accumulation.

## About Hunter Douglas

Business is people. At Hunter Douglas, we pride ourselves in our employees—a network of experienced, intelligent, passionate and creative men and women from over 100 countries who work together in a spirit of collaboration. Along with proven manufacturing process and material usage, that collaboration is what keeps Hunter Douglas at the forefront of innovation and design.

## Architectural Services

Hunter Douglas is fluent in design. Working with architects and contractors, we translate aesthetic specifications into construction requirements, creating solutions that express the vision of each project. For over 60 years, this collaborative approach has contributed to thousands of buildings around the world.

We define success by our ability to meet unique challenges, define new products and applications, and find ways to do more with less. From pre-engineered standards to innovative custom systems, the Hunter Douglas Architectural team helps you create versatile, sustainable and durable ceiling and wall solutions.

Hunter Douglas products and solutions are specifically designed to improve the indoor climate and save energy. They create an environment that is pleasant, healthy, productive and sustainable.

Hunter Douglas aims to produce sustainable products. Our painting and aluminum smelting processes are regarded as setting the bar for the most important standards in clean production methods. All aluminum products are 100% recyclable at the end of their lifecycle.
