THERMOWOOD PLASTIC COMPOSITE (TWPC)

LUNAWOOD THERMOWOOD is a beautiful, sustainable wood material produced by using natural methods, heat and steam. Thermowood is dimensionally stable, resistant to decay and non-toxic. It can be used inside or outdoors, in any climate. Lunawood is an eco-friendly natural product which is easy to machine and install.

LUNATHERMO-D

The letter D in Lunathermo-D stands for durability. Along with appearance, biological durability is a key property in the end use applications of products in this treatment class. The average tangential swelling and shrinkage due to moisture for Lunathermo-D is 5-6%. Thermo-D class Thermowood is classified as durable according to the EN 113 standard; i.e., its natural resistance to decay meets class 2 requirements.

Recommended end use: outdoor applications like façade and decking

LUNATHERMO-S

The letter S in Lunathermo-S stands for stability. Along with appearance, stability is a key property in the end use applications of the products in this treatment class. The average tangential swelling and shrinkage due to moisture for Thermo-S class treated wood is 6-8%. Thermo-S class Thermowood is classified as relatively durable according to the standard EN 113; i.e., its natural resistance to decay meets class 3 requirements.

Recommended end use: interior applications

DECKING CLASS: LUNATHERMO-D

Lunawood Thermowood is an outstanding decking material due to its stability and durability. Improved insulation properties make Lunawood an excellent choice for decking since it balances the changes of heat and cold and makes it pleasant to walk on even when barefoot. Lunawood's unique PROFIX hidden fixing clip enables quick and easy installation of the deck and creates a clean and elegant appearance without visible screws.

INTERIOR CLASS: LUNATHERMO-D AND LUNATHERMO-S

Lunawood boards are light, easy to cut, shape and install. In addition to its attractive appearance the thermal modification of wood eliminates the risk of harmful emissions such as formaldehydes. This makes the wood pure, safe and hygienic for indoor use. It is also a perfect material for hot and humid environments like sauna and spa.

FRAMES AND BEARERS CLASS: LUNATHERMO-D

Lunawood Thermowood is an durable, safe material for many kinds of garden and outdoor structures. Out of our planed profiles it's easy to create a dream wooden garden with pergolas and partition walls. It will become a natural eyecatcher as an attractive walkway, ideal for climbing plants with its airy construction. A stylish partition wall defines the borders in gardens or built environment in a natural way. Not for direct soil contact.

THERMOWOOD PLASTIC COMPOSITE (TWPC)

LUNAWOOD THERMOWOOD PLASTIC COMPOSITE contains 65% thermowood fibre and 20% good-quality CIRCO® recycled polypropylene plastic. Lunawood TWPC is the most stable wood composite available in the market. It is non-toxic and off cuts can be burnt or recycled. The resulting product is 200% Thermowood, as there is more Thermowood than in the solid wood of the same dimension.

Fortum Circo®

CIRCO® recycle is a cost-effective industrial raw material for replacing virgin raw materials. By selecting recycled plastic as raw material, we can reduce our carbon footprint and environmental load. This new generation of renewed plastic is produced at Fortum's new and modern recycling plant that efficiently separates and cleans the materials supplied for recycling, while being friendly to the environment.
