

# Bona Retarder

## Technical data sheet

**Bona Retarder** is designed to retard the drying or curing process of Bona waterborne finishes, allowing for more open time in less than ideal working environments, such as very hot/dry climates.

### Technical data

**Physical Characteristics:**

**Ingredients** – Water and diethylene glycol monoethyl ether.

**Color** – Clear

**Density** – 8.33 lbs./gallon (1.0 S.G.)

**US Regulatory VOC** – <275 g/l when used with a Bona Waterborne Finish

**Odor** – Non-offending

**Stability** – 1 year shelf life in unopened container

**Packaging** – 5.4 ounce plastic bottle

### Recommended Use

Can be added to any Bona waterborne finish (Bona Naturale®, Bona Traffic®, Bona Traffic HD®, Bona Mega®, and Bona Novia™) to retard the drying or curing process.

### Directions

**BEFORE USING, READ ALL DIRECTIONS AND SAFETY DATA SHEETS.**

**FOR TECHNICAL ADVICE:** Call Bona US at 800/872-5515

**MIXING INSTRUCTIONS:** Add one 5.4oz. bottle of Bona Retarder to 1 gallon of Bona waterborne finish (Bona Traffic, Bona Traffic HD, Bona Mega, Bona Novia) then shake thoroughly for 15 – 20 seconds. Once mixed, apply finish according to label instructions.
