

Mondolux

Mondolux is an innovative lighting brand developed by Aglo Systems. Our promise is to continually improve our clients' lighting experience.

Showcasing on-trend lighting products utilising the latest technology with a guaranteed quality that will impress. We deliver a multitude of technical information with downloadable resources and a product configurator that makes sourcing the perfect lighting solution simple.

Comprehensive Catalogue

A wide range of products are available in many different sizes, lumen outputs, beam angles, accessories and colour temperatures. CRI90 is the standard available for retail and residential applications.

Detailed Technical Data

Clear technical drawings, detailed product photos, illumination diagrams, IES files and installation instructions.

Easy Configurator

The product configurator enables users to search by any technical parameter, allowing you to save significant time when searching items.

High Quality

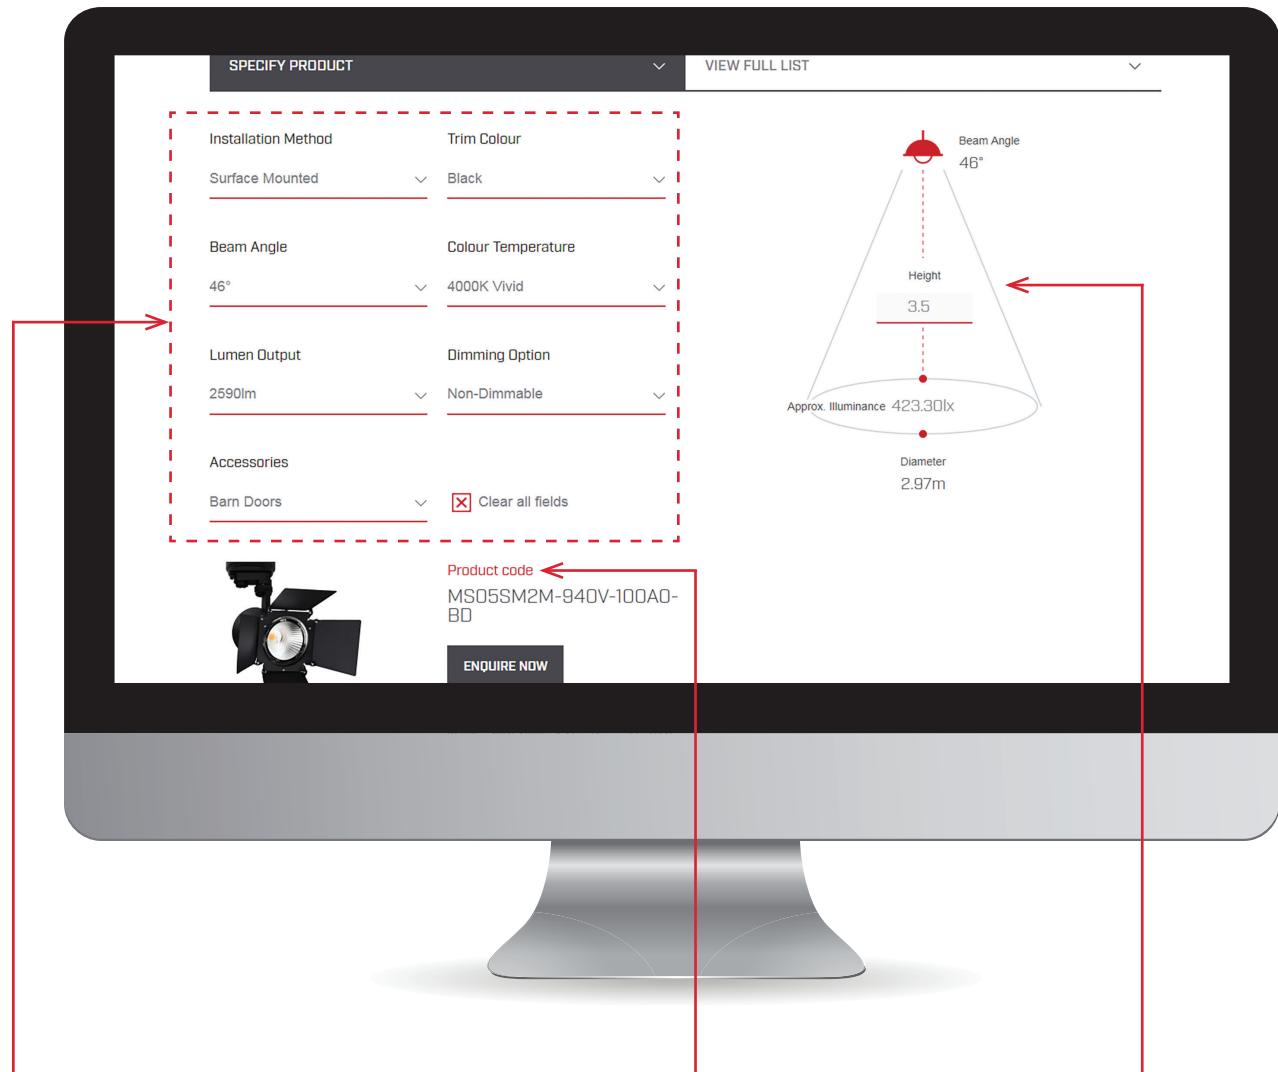

Our products are thoroughly tested, warranted and certified to meet Australian, New Zealand and European compliance standards.

Quick Turnaround Times

With a stocked warehouse of 3000sqm and an experienced assembly team in Melbourne, we are able to fulfil your order quickly.

*Continually improving
your lighting experience*

Product Configurator

Easily select product specifications

Choose products based on their design specifications around different system parameters like wattage, lumen output, beam angle, colour temperature, etc.

Locate product codes

Filtering products based on requirements, enable users to find the specific item code for a product and enquire about it. The product enquiry will enable us to know about the exact user needs.

Calculate lux levels based on different heights beam angles

Exact lumen output can be determined for any product based on the mounting height.

Downloads & Resources

Download .ies files

A set of .ies files can be downloaded for all products enabling the users to carry out accurate lighting designs.

Download datasheets

Highly informative datasheets available to download including all performance specs, technical drawings, high resolution images and packaging details.

Download .rvt files

Accurately designed Revit files available to download for architects, engineers and designers aiding them in building information modelling.
