

Anodizing successfully combines science with nature to create one of the world's best metal finishes. It takes the natural oxidation process and helps it along by adding electricity and chemicals to produce a dense surface that is integral with the aluminum. This process brings out the natural variation in the aluminum (color variation can be expected). This durable and beautiful finish is available in many shades and is a perfect pair with the Dri-Design system.

## Technical Information:

**System Depth** - 1 ¼" nominal

**Material** - Aluminum

**Material Thickness** - .080" standard (other gauges available)

**Panel Joints** - ½" nominal standard (1/8" – 1" available)

**Finish** - Clear, Bronze, Champagne and Black Anodized

**Finish Warranty** - 5 year standard (10 year available)

**Weight** - Less than 2 pounds per square foot

## Panel Size Parameters:

These are the recommended maximum size panel guides. If the panel you would like fits inside these guides, Dri-Design can easily manufacture it. For larger sizes, please contact a Dri-Design representative to discuss your specific requirements.
