

KEIM LIGNOSIL[®]-VERANO COLOUR SHADES

NATURALLY BEAUTIFUL WOODEN FACADES

KEIM LIGNOSIL®-VERANO FOR CONTROLLED GREYING

Grey wooden facades have a particular charm. But it may take decades until the wood shows an evenly grey patina like a mountain hut in the Alps. Untreated wooden facades change their colour and texture under environmental influences. It is difficult to predict such changes because many factors influence the different facade surfaces of the building exposed to the weather in various ways. Wood type, direction, location, rainfall, air purity and the constructional prerequisites decide on the colour development. KEIM Lignosil-Verano, a silicate based finish, produces a naturally beautiful, silver-grey patinated wood appearance from the first application.
