

Luna Pre-Greyed

Luna Pre-Greyed treatment offers a high-quality grey finish for the exterior applications, with installation-ready Lunawood Thermowood Cladding, characterized by a pre-aged appearance.

Luna Pre-Greyed treatment is achieved with non-toxic coating which will disappear after several years* of installation and reveal the naturally greyed Lunawood Thermowood. In order to give a robust and natural appearance, the treatment is also available on a brushed surface.

- Complete exterior cladding with even, grey color and beautifully weathered look
- Factory treated, installation-ready product
- No maintenance required
- Non-toxic, no micro plastics and odor-free

Lunawood Pre-Greyed provides a premium and completely natural finish. Both Lunawood Thermowood and the treatment are non-toxic. The coating consists only of natural ingredients: silicates, mineral pigments and lignin. The Pre-Greyed surface will make way to the wood's own naturally weathered grey color after several years. In order to have the most appealing and robust pre-aged appearance, we recommend a brushed surface. The surface treatment does not provide any protection to the wood.

WWW.LUNAWOOD.COM

Finnish Lunawood Thermowood is a beautiful and sustainable wood material produced using natural methods, heat and steam. Thermowood is dimensionally stable, resistant to decay and non-toxic. Our Thermowood is an outstanding choice for exterior claddings and facades.
