

Louis Poulsen Revit Family Instruction

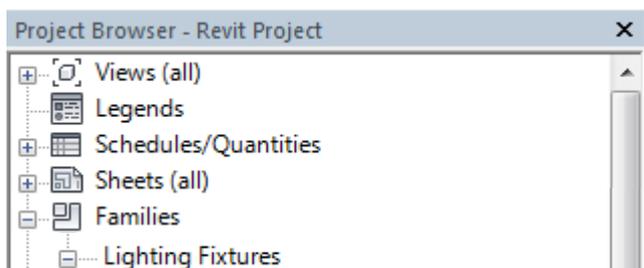

1. After downloading these files make sure to save at least your Text Document, Revit Family and IES File on the same and following location:

C:\LP-REVIT\IES\

2. Open your Revit Project.
3. In the ribbon bar choose *Insert* then *Load Family*.

4. Locate your Revit Family and click *open*.
5. You will now see a list of all the different variants of the chosen product. Choose the desired variant and click *open*.
6. Your Louis Poulsen Revit Family is now located in the Project Browser under Families – Lighting Fixtures. From here, you can drag and drop the product to a surface in your project.

N.B. Currently all color/material variants are not available for all our products.

We are working on the issue and until it is corrected, you are always free to edit the materials of your Revit Family parts yourself.

Please feel free to report to Louis Poulsen A/S if you encounter any other issues with your downloaded files.
