KEIM Stucasol® – worldwide first render with t

**Sol-silicate render –
silicone resin was yesterday**

KEIM Soldalit's successful story emerges into the world of pasty renders.

Stucasol as first sol-silicate render on the market combines the convincing, building-physical properties of silicate building materials with the advantages of sol-silicate as binder. Simple and safe processing, homogeneous surfaces, multi-purpose use. Moreover, elevated weather protection and non-combustibility. It couldn't be better!

**Absolutely colourfast –
typical KEIM**

KEIM Stucasol® captivates by sensational luminosity and long-term durability.

Stucasol contains solely inorganic, absolutely lightfast colour pigments. The pigments are very stable and homogeneously embedded into the render matrix thanks to the sol-silicate binder.

**Perfect look –
even without painting**

KEIM Stucasol® convinces with a uniform and fascinating, vibrant appearance.

It is not necessary to paint Stucasol, so grain and texture remain visually unaltered. Without a coating the appearance of the grains in the render are accented and resemble the scratch render of earlier days.

The binding agent sol-silicate + +

In brief

- + Durable colour shades even without an additional paint coat
- + Harmonic, stainless appearance
- + Particularly intensive shades are possible
- + Archaic-beautiful texture and characteristic, mineral matt look
- + Especially economic thanks to easy processing
- + Intensive colour shades are complemented with the tinted primer Stucasol-Fondo

**Excellent processing –
fantastic surface**

**My opinion:
Highly recommended!**

KEIM Stucasol®

KEIM Stucasol® is easy to apply and dries perfectly without any noticeable stains or marks.

Stucasol is the first and only silicate render that does not require to be painted. The application properties are outstanding: Easy and simple! The surface dries uniformly: No pinholes, no edges – just perfect!

Environmentally compatible, durable and super to apply. It couldn't be better.

„Can I recommend KEIM Stucasol? Most definitely! First all tradesmen want to deliver good performance and top-quality handicraft which requires the best material. Without a doubt, a silicate render gives the customers and us a good feeling right from the beginning. And plus, Stucasol is so easy to apply. There is nothing better!“

Jörg Pernau, professional painter from Vechelde

KEIM Stucasol®

- Innovative sol-silicate binder
- Impressively different!

- ✓ Ready-for-use
- ✓ Safe application
- ✓ Colourfast
- ✓ Weather-resistant
- ✓ Incombustible A2-s1, d0
- ✓ Utilization on various substrates
- ✓ Striated or scratched texture
- ✓ Water-repellent
- ✓ Highly CO₂ and water vapour permeable
